

PRESS RELEASE

Javier Cañete, Gigas' new Managing Director and CFO

- **A solid track record with over 25 years of experience in the telecommunications sector**
- **Cañete will head operations to transform the Spanish company into a provider of converged telco, IT and cloud services**

Madrid, 22 February 2021. Gigas (GIGA.MAB), a Spanish multinational specialized in converged telecommunications services, IT and cloud services for companies, has appointed Javier Cañete as its new Managing Director and Chief Financial Officer (CFO) to head, alongside the company's current management team, the transformation of the company. This follows the recent acquisition of the Portuguese operator ONI as well as MásMóvil's corporate client telecommunications portfolio.

Before joining Gigas, Cañete, who has a solid track record with over 25 years of experience in the telecommunications sector, was the CFO at Zener Group – a Spanish multinational specialized in the installation and maintenance of telecommunications networks and renewable energies. Previously, as Director of Management Control at Euskaltel Group, he designed the business plans for Euskaltel Group to expand within Spain.

In 1995, Javier began his professional career in the telecommunications sector as the Director of Finance, Administration and Human Resources at TeleCable, a leading telecommunications provider in Asturias. He holds a degree in Economics and Business Administration from the University of Oviedo.

In the words of Diego Cabezudo, CEO and co-founder of Gigas, *'At this new stage it was important to strengthen the team. We are fortunate that a professional like Javier – with such extensive experience in the telco sector – is joining us. I am convinced that his contribution, good judgment and experience will allow us to continue growing and to position ourselves as the leading converged cloud telco provider for the Iberian Peninsula.'*

About Gigas

Gigas is a Spanish multinational specialized in converged telecommunications services, IT and cloud services for companies (GIGA.MAB), and is listed on the BME Growth market (GIGA.MAB). Set up in 2011, it has become a pioneer in offering technologically innovative, knowledge-based comprehensive turnkey service to address the challenges that today's telecommunications pose for companies. Offering comprehensive and customized solutions to both large companies and SMEs, it is esteemed thanks to its exceptional technical support and for being there for its clients every step of the way. With 11 datacenters in Europe, the USA and Latin America, the company has offices in Spain, Portugal, Ireland, Colombia, Chile, Peru, Mexico and the USA.
