

Gigas SIP is an IP technology-based solution that helps to optimize the functionalities of the IP switchboard while also maximizing the investment by creating a virtual data circuit through which your company's phone calls will flow.

The Gigas SIP service allows Voice over IP (VoIP) connection from your virtual switchboard or PBX to the Public Switched Telephone Network (PSTN) through a SIP trunk supported by an internet access service. This VoIP connection supports incoming/outgoing calls and includes a set of geographic numbers for identification and support.

**MAKE IT CONNECTED, MAKE IT GIGAS.**

**BENEFITS**

**Simplified**

A single IP Communications infrastructure.

**Scalability and Flexibility**

Easily expand your connection (voice channels) without additional investments.

**Compatibility**

Works seamlessly with a wide range of manufacturers and IP PBX equipment.

**Cost Reduction**

Centralize your voice communications, reducing current costs associated with traditional circuits.

**Gigas SIP Features**

**Access**

Access to the Gigas SIP service is provided through an internet connection provided by Gigas or third parties.

**Technology**

The connection between the IP telephony equipment and Gigas SBC (Session Border Controller) supports VoIP SIP (Session Initiation Protocol) signaling. Supported voice codecs include: G.711 and G.729.

**Numbering**

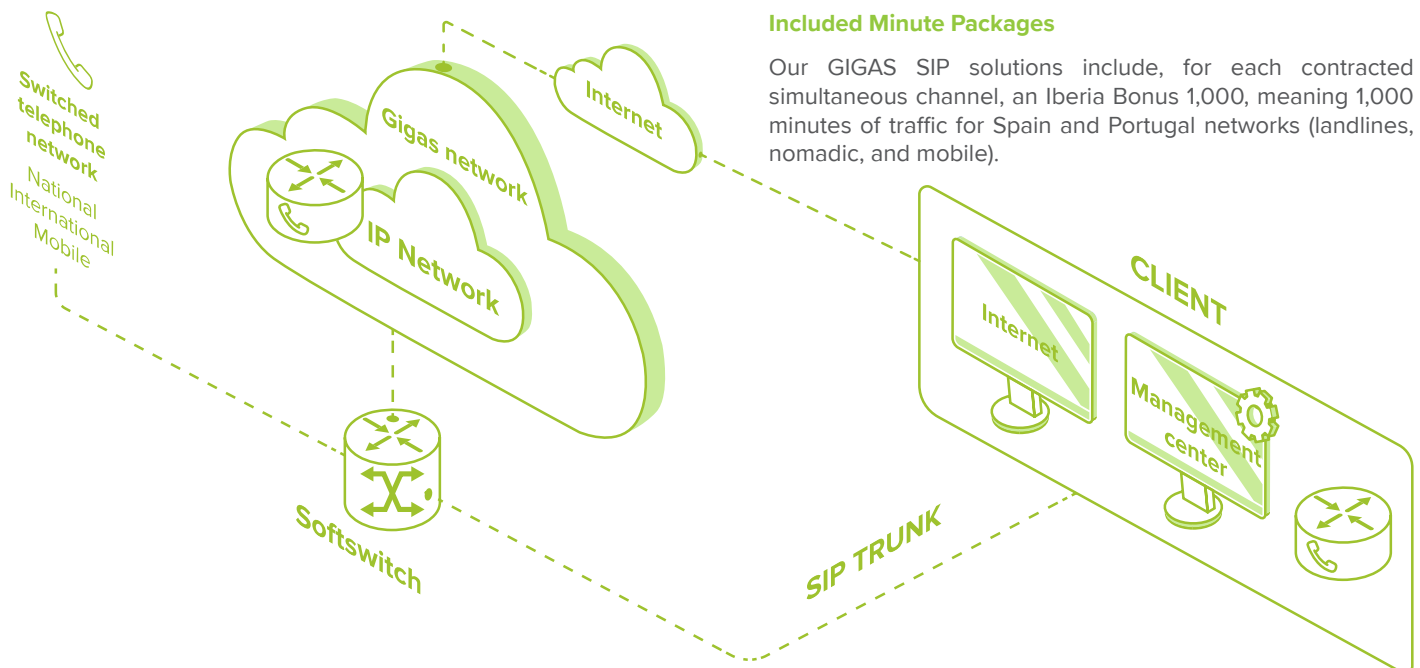

Each Gigas SIP Plan comes with an extensive set of geographic numbers.

**Security/Encryption**

Signaling can be encrypted using TLS (Transport Layer Security). Audio media can also be encrypted using SRTP (Secure Real-time Transport Protocol).

**Included Minute Packages**

Our GIGAS SIP solutions include, for each contracted simultaneous channel, an Iberia Bonus 1,000, meaning 1,000 minutes of traffic for Spain and Portugal networks (landlines, nomadic, and mobile).

## SIP TRUNK Plans

Order a GIGAS SIP with the channels and services best suited to your business.

<p><b>SIP 2</b></p> <p><b>2</b> voice channels</p> <p><b>Up to 10</b> geographic numbers included</p> <p><b>2.000 minutes</b> to fixed-line and mobile networks (Spain and Portugal)</p> <p><b>12 €</b> per month <b>40 €</b> Upfront subscription fee*</p>	<p><b>SIP 4</b></p> <p><b>4</b> voice channels</p> <p><b>Up to 20</b> geographic numbers included</p> <p><b>4.000 minutes</b> to fixed-line and mobile networks (Spain and Portugal)</p> <p><b>23 €</b> per month <b>40 €</b> Upfront subscription fee*</p>	<p><b>SIP 8</b></p> <p><b>8</b> voice channels</p> <p><b>Up to 40</b> geographic numbers included</p> <p><b>8.000 minutes</b> to fixed-line and mobile networks (Spain and Portugal)</p> <p><b>50 €</b> per month <b>60 €</b> Upfront subscription fee*</p>

\* Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia (landline only), Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Lithuania (landline only), Luxembourg, Netherlands, Norway, Poland, Portugal, Romania, Slovakia (landline only), Sweden, Switzerland (landline only), UK, Vatican.

\*\* Australia, Brazil, Canada, Chile, Colombia, Costa Rica, India, Japan, Mexico, Panama, Peru, Puerto Rico, USA.

The GIGAS SIP service consists of a SIP Trunk with the chosen configuration: number of channels, DDI, and includes the Iberia Bonus 1,000 for both landline and mobile calls. The bonuses included in SIP products and additional bonuses are shared across all channels. Additional bonuses are promotional and their prices are subject to variations that will be duly communicated to customers. The client's virtual SIP Trunk circuit is validated on the GIGAS network with the client's fixed IP, which must be provided to GIGAS. The call forwarding functionality may involve an increase in the tariff depending on the number to which calls are forwarded. Solutions for contracts lasting more than 12 months do not incur setup fees in their plans. Any additional reconfiguration requested will have an additional cost of €50/hour of work. The client can request a prior quote. Prices do not include VAT.
